Patient Financial Information

We understand the financial burden of cancer care can be overwhelming at times. We have created payment plan programs that provide added financial flexibility for patients.

Caris Molecular Intelligence® is a comprehensive molecular profiling test used to personalize cancer care. The results from your test will help your physician determine the most effective treatment for you.

Insurance Coverage

Typically, Caris Molecular Intelligence (CMI) is reimbursed by insurance providers including Medicare. Costs will vary based on services, the tests offered, the number of genes and biomarkers analyzed and the types of technologies used during testing.

Insurance Verification

Prior authorizations, claim submissions and appeal processes with your insurance company will be coordinated by Caris Life Sciences® on your behalf.

If prior authorization is denied, Caris will continue to appeal the decision and the claim.

Financial Assistance and Patient Navigators

For patients who are uninsured or cannot afford out-of-pocket costs, financial assistance is available to minimize patient responsibility as much as possible.

Our experienced team of Patient Navigators help:

- Answer questions about molecular profiling,
- Explain the CMI Report, and
- Review the Explanation of Benefits (EOB) and financial aid options.

Convenient. Comprehensive. Cost-effective.

9 out of 10 patients have no out-of-pocket costs

**Insurance pays the entire cost for most patients.
For patients paying out-of-pocket, the average
cost is ~\$350.**

Patient Resources

- **MyCancer.com** – MyCancer.com is a patient-friendly website with additional information about molecular profiling, cancer biomarkers and the transformation of cancer treatment through personalized medicine.
- **Compassionate Care Program** – Caris has a Compassionate Care Program to assist uninsured patients or those who may not be able to afford any associated out-of-pocket costs.
